

Wider feed deck opening for higher capacity.

CASE IH PICKUP HEADERS	Combine Model		
		2500 Series	7010/8010
Rake-Up Configurations	14 ft. (4.3 m)	2015	2016
14 & 16 ft. Configurations	16 ft. (4.9 m)	—	2016
Belt-Type Configurations	14 ft. (4.3 m)	2015	2016
14 & 16 ft. Configurations	16 ft. (4.9 m)	—	2016

2015/2016 Features:

- Optional hydraulic crop hold down
- 24 in. diameter floating auger
- Variable speed hydraulic drive
- Two-stage delivery unit
- Center-balanced shock-absorbing pickup suspension

The Case IH 2015 or 2016 belt-type or rake-up pickup header best handles the high-capacity harvesting of cereal grains, beans, peas, lentils or canola.

Rake-up. The rake-up header (shown) features six aluminum extruded finger bars to gently comb crop material into the header, and a draper belt that carries the crop back to the auger and into the feeding area.

Belt-type. The belt-type pickup header features four individual rollers, a pickup belt that engages and gently lifts crop into the header, and it uses the same draper found on the rake-up to carry crop into the auger. The belt-type pickup header is ideally suited for all windrowed crop harvesting needs.
